

PRESS RELEASE

New Solaris Urbino wins design award

Bolechowo, 27.02.2015

The recently-launched new Solaris Urbino, the flagship product of the innovating manufacturer of city buses and trams, was honored with the prestigious international iF DESIGN AWARD 2015. The joint work of Solaris's engineers and studioFT design agency from Berlin was appreciated by a jury consisting of 53 international experts in the field of design.

amp;

The winning designs were selected by professionals from over twenty countries. The experts spent two days deliberating over almost five thousand projects from all over the world. The iF DESIGN AWARD 2015 was celebrated on 27th February at BMW World in Munich. Since 1953, the independent iF AWARD has been given to the most outstanding designs.

The new Solaris Urbino rewarded with the award had its world premiere during the 2014 IAA Exhibition in Hannover. It is a completely new design of a city bus, which provides robust rigidity while being significantly lighter in weight. The innovative construction of the vehicle is expected to lower fuel consumption and operating costs and guarantees highly distinguished aesthetics. High standards of comfort for passengers were achieved through a spacious and bright interior supported by its assured handling. The whole was completed with the eye-catching, expressive, but also functional design which creates attractive travelling environment for passengers.

The intention of the designers was to create a city bus that by its mere appearance and appealing interior would increase passenger growth and make public transport more popular. Hence the visible growth of available space in the passenger saloon, wider and higher doors as well as a significant number of pedestal-free seats. Bigger windows and LED lighting ensure the comfort of the journey.

The more expressive design of the new Solaris suggests that the manufacturer is ready to respond to the challenges future public transport is faced with. The overall result of the intensive work of all the team will improve the satisfaction as well as the comfort of passengers, drivers and operators. We are glad that jury of the iF and Top Design awards appreciated the unity of exterior and interior design which was the strategic concept of the idea. These two awards will undoubtedly boost Solaris's profile, especially now that the new buses enter production', says Jens Timmich of Berlin-based studioFT, co-designer of the new Urbino.

The new Solaris Urbino also generated highly positive feedback in Poland. The new Solaris Urbino was honored with the TOP Design Award. The celebration took place during 'arena DESIGN' exhibition between 17th and 20th February in Poznań. Dozens of international experts in the field of industry design gathered at the event. The jury appreciated examples of unparalleled design quality in business fields. The new Solaris Urbino was awarded in the automotive industry and public transport category.

About Solaris Bus & Coach

Solaris Bus & Coach is a major European producer of city, intercity and special-purpose buses as well as low-floor trams. Since the start of production in 1996, over 12 000 vehicles have already left the factory in Bolechowo near Poznań. They are running in 29 countries. Despite its young age, Solaris

has become one of the trendsetting companies in its industry. For many years it has been the indisputable leader among the suppliers of city buses in Poland as well as one of the largest suppliers of city buses in Germany.

About our company

Solaris Bus & Coach sp. z o.o. is one of the leading producers of city and intercity buses in Europe. It focuses in particular on the development of zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. This has resulted in the widest zero-emission product range in the European market and a leading position in this segment with a market share of 15.2%. Nearly 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. Moreover, all activities undertaken by the manufacturer are in line with the brand's mission, which is reflected in the motto "We are changing the image of public transport". Solaris also actively partners with public transport operators and provides them with comprehensive support in their transition to zero-emission mobility.
