

PRESS RELEASE

Solaris opens new spare parts logistics center

Jasin, 21.09.2017

Starting from September Solaris all spare parts ordered at Solaris are delivered from the newly opened Solaris Logistics Center, based in Jasin, Poland. The new distribution center will improve the process of product supply and raise the quality of after-sales customer service.

Solaris Logistics Center is both the new warehouse and sales office, which process orders placed by the customers. The new spare parts distribution base replaced the one located in Murowana Goślina. Starting from September the new warehouse ships all goods directly to customers, as well as supplies local warehouses and services.

The new distribution center is based nearby Poznań, in Jasin, which is located by main expressway leading off directly to the A2 motorway. Consequently, travel time to main roads and European motorways network has been reduced six times. In the area of 6 000 m² Solaris Logistics Center stocks over 26 000 different parts and accessories.

Up to 300 dispatches are shipped daily. 3 000 pallet racks and 100 glass racks provide highest storage quality, and dedicated conveyor belts speed up order picking. The flow of goods will be faster also due to more loading and unloading docks. All parts are stored in one hall, which saves time for transporting them from one building to another. All these have, in consequence, noticeably improved the warehouse efficiency.

The orders and deliveries are processed by specialist warehouse management system, which also helps provide maximum availability of parts. All the state-of-the-art solutions in Solaris Logistics Center, reduce the time of deliveries and, effectively, minimize vehicles' downtime. Customers will notice major improvement to service quality.

About our company

Solaris Bus & Coach sp. z o.o. is one of the leading producers of city and intercity buses in Europe. It focuses in particular on the development of zero-emission vehicles, i. e. electric and hydrogen buses as well as trolleybuses. This has resulted in the widest zero-emission product range in the European market and a leading position in this segment with a market share of 15.2%. Nearly 25,000 Solaris vehicles have been delivered so far and they ply the streets in 850 towns and cities across 33 countries located throughout Europe as well as beyond it. Solaris is part of the Spanish CAF Group (Construcciones y Auxiliar de Ferrocarriles) S.A. From conception, to the design and manufacturing phases, all Solaris buses are produced in Poland. Moreover, all activities undertaken by the manufacturer are in line with the brand's mission, which is reflected in the motto "We are changing the image of public transport". Solaris also actively partners with public transport operators and provides them with

comprehensive support in their transition to zero-emission mobility.
